

We took part in the EU Mission forum – BlueMissionBANOS

We are pleased to share that we participated in the EU Mission forum organized under the BlueMissionBANOS project. The event aimed to inspire, engage, and support stakeholders from across the Baltic and North Sea regions in the transition toward a carbon-neutral and circular blue economy.

The forum culminated in the co-creation of a roadmap that will guide the region toward achieving the objectives of the EU Mission: Restore our Ocean and Waters. This initiative is focused on increasing awareness, showcasing opportunities, and inspiring stakeholders to take action in preserving our oceans, seas, and waters through 2030 and beyond.

By working across borders and projects, we bring together cultures, perspectives, and expertise to develop the best ideas and joint solutions. With our support, projects contribute to building a green and resilient region, making life better for people around the Baltic Sea.
